"A time of turbulence is ... above all
a time of opportunity for leadership"
P. F. Drucker

On behalf of our Board of Directors welcome to the Association's Twelfth Annual Meeting and Industry Conference.

Few would deny that 1984 will be a turbulent time for the A/C pipe industry. A time when the "good vibrations" emanating from a revitalized, pulsating economy are being dampened by the "bad vibes" given out by the threat and tone of further government regulation.

As Peter Drucker has pointed out " ... a time of turbulence is a dangerous time, but its greatest danger is a temptation to deny reality." Whether by design or ironic happenstance, the specter of "big brother" i.e., draconian regulation, has become a very real and repugnant reality in 1984. How the industry plans to face up to this reality will be the crux of this year's Industry Conference, **Vibrations '84**.

Vibrations '84 will also provide an opportunity to examine today's "economic realities," tomorrow's "megatrends" and what steps other business sectors have taken "in search of excellence."

But above all, **Vibrations '84** is a time of opportunity for leadership!

President

**A/C PIPE PRODUCERS ASSOCIATION
12th ANNUAL MEETING AND INDUSTRY CONFERENCE

OSHA Ed Warren

1972 - 1975 proposed standards under way
agreed by Labor Dept. & Congress

Law 1 - Regulation date - probably 3-6 months before

F.P.A. - Ed Warren

Questions to 1972 - January 1972

From 2. write to F.P.A. administration

raise question as

What question is upon F.P.A. action

3. Open dialogue rather than law

4. More communication in situation, so that
that activities

By 1972 - January 1972

At least in the situation, so that Congress
uses law which is power of state
