VINYL CHLORIDE EXCURSION SAMPLE

The results of your Vinyl Chloride exposure on February 28, 1986 while disconnecting the ship GALARA was 12.89 ppm. You wore a fresh air mask while performing this job; therefore, this is only a potential exposure. There was no actual respiratory exposure to Vinyl Chloride.

You may make arrangements with our medical for a physical if you so desire.

A handwritten signature in dark ink, appearing to read "E. J. Singleton".
