On Monday, February 17, 1975, we had a visit from Mr. John Kutt of Environmental Science and Engineering, Inc. of Gainsville, Florida.

Mr. Kutt dropped by this morning to discuss the sampling procedure he is going to use for PCB's in Sauget Village. During the next two days, sixteen soil samples will be collected within Sauget Village for PCB analysis. In addition, one influent and effluent composite sample from the Sauget Waste Treatment Plant will be analyzed for PCB's. At this time no further samples are planned. The above referenced memo details the guidelines that Mr. Kutt will use in collecting the samples.

Please advise if you have any questions on this matter.
