MVC and PVC Environmental
Related Studies

Distribution:	R. Eichner	J. Kelly
	R. Antieau	J. Sweeney
	A. Shanks	R. Sardinak
	K. Licht	P. A. Taylor
	C. Honeycutt	J. A. Kleinhaus
	D. Flete	R. Laundrie

I have been requested to institute and coordinate a program to accumulate the various costs associated with MVC and/or PVC environmental related studies. I am aware of the following projects, and undoubtedly there are others.

Lawrence	4970-001-005 Modify Gas Chromatograph for Vinyl Chloride Testing	\$ 3,800
Reading	Hewlett Packard Gas Chromatograph for Vinyl Chloride Testing	5,989
Ashtabula PVC	4950-001-001 Portable Gas Analyzers for Vinyl Chloride Monomer	4,530
Pt. Pleasant	4810-001-003 Century Portable Organic Analyzer for Vinyl Chloride Monomer	1,765
Plastic Devel. (Laundrie)	4998-001-002 Hygienic Test Instrument for Vinyl Chloride Monomer	110,000
Ashtabula PVC	Exp. 424-B MEA Study - Carcinogenic effects of VCM	12,000
Ashtabula PVC	4950-100 Environmental Control and Protection	113,500
Ashtabula PVC	4950-101 NIOSH-OSHA Required Personal Support Equipment	26,500
Ashtabula PVC	Gas holder Liner Replacement	45,000

Non-Appropriations

Physical Testing of Lab Samples

Medical Testing of Personnel

Your judgment will have to be exercised whether parts of appropriations pertain to PVC environmental related studies or not. An example is in the Gasholder Liner Replacement. It might be argued that the primary reason for replacement is to insure continued good yields and not for environmental reasons.

I need a report from you for May 1974 Year-to-Date fiscal year expenditures on the above mentioned type projects. Please initiate the coding or other techniques necessary to provide information from which aggregate expenditures can be determined at the end of every month until further notice, and forward it to my attention by the 14th working day of the following month. This information should be reported in a descriptive meaningful manner.
