

1 studies.

2 The next interrogatory was whether they have
3 ever recalled their asbestos-containing products after
4 becoming aware of the possible health hazards
5 associated with asbestos; and they admit that they did
6 not engage in a recall of their products, asbestos-
7 containing pipe and Kaylo block insulation.

8 They do state that after 1972 they removed
9 asbestos from their product.

10 And I added that in, Mr. McGowan.

11 State in detail what studies, if any, you
12 ever conducted or directed with regard to the
13 quantity, quality, or threshold limit values of
14 asbestos dust, fibers, or particles to which
15 insulators and others who used your asbestos products
16 and/or others working in the same vicinity are
17 exposed; and their answer was none.

18 State in detail what research, tests, or
19 studies, if any, you ever conducted or directed to
20 determine whether the exposure of insulation workers
21 or others to asbestos dust exceeded the ACGIH
