I am aware of that one, yes.

Q Okay. Again, this is a document that would have been sent to Ford and Lincoln-Mercury dealers, not to independent service garages?

A I can't think of the name. Helm Publications are the ones that write all of these as well, yes.

Q Would you agree that this 1975 technical bulletin doesn't mention anything about no grinding and no sanding?

A In this particular one it says you clean the brake with a vacuum cleaner. It says use good exhaust ventilation. Good common sense, yes.

Q Sure. I would like to show you the next document, Ford Defense Exhibit 42, and ask you if you could identify that for us, please.

A It has health safety environmental hazard information, but it doesn't say who it is from. It is dated November, '83. Apparently it was from some Ford document --

Q I don't mean to interrupt.
