Subject: Insulation on Welding Vehicle - West Plant

At approximately 4:00 p.m. this date Charlie Elliott brought to my attention what appeared to be insulation particles on the hood of his welding truck. Upon investigation it was evident that there was in fact insulation on the hood of the vehicle. I instructed him to remain until further investigation could determine if asbestos was present and a cleanup coordinated. Larry Huwe was informed of the situation and directed Rene Borrego to execute a cleanup.
