S74-824

(Gross description, histologic examination and diagnoses)

Gross:

The specimen consists of two submitted slides bearing the label of St. Anthony Hospital, Louisville, Kentucky and the number S74-0545. Also received is a copy of the surgical pathology report.

Microscopic:

Section of the gallbladder shows hypertrophy of the muscularis with irregular fibrosis of the gallbladder wall and surrounding fatty tissue. There is an irregular inflammatory infiltrate present, chiefly lymphocytes, but with a few polys in the mucosa.

Section of the liver shows slight portal tract fibrosis with a mild inflammatory infiltrate of lymphocytes. A few of the sinusoids are dilated and there is slight enlargement of some of the sinusoidal lining cells. Slight fatty metamorphosis is noted. There is no cholestasis. Focally the hepatocytes show variation in size (megaloctytosis). The hepatic capsule is normal.
