intracompany memo

to Mr. R. E. Morse
from C. W. Lehnert
subject Joint System Brochures

location Portland
location Tigard
date April 26, 1977

Dob, we have been successful in eliminating talc (fibrous) from our wall texture, so you can begin to distribute the latest literature which indicates that our entire texture line is asbestos free.

As we discussed previously, you will strike out the asbestos free on the casein bags pictured in the brochure. We have field tests in progress but have no feedback as yet on the asbestos free casein products. Continue to strike out the asbestos free on the casein products until we advise you otherwise.

C. W. L.
