November 1, 1966

W.O. Roll No. 256

1. General

a. This job involves the removal of chlorinator baskets from Nos. 1, 2, 3, and 4 chlorinators.

b. The large crane will be utilized and the procedure should be similar to the existing procedures for basket removal and repair.

2. Building work

None

3. Equipment

a. Visual inspection of each chlorinator will be made by the [illegible] foreman and additional work necessary to provide the department with reliable units will be charge as true repair.

4. [illegible]

None

5. Structural and Miscellaneous

None

6. Piping Work

a. [illegible] as necessary to complete the job

7. Electrical Work

None

8. Instrumentation

None

9. Insulation

a. Replace or renew insulation removed or damaged during the job.

10. Miscellaneous

a. Safety - Aroclor is a toxic hazard; however, at atmospheric temperature and in an open area, no side effects should be experienced by the workers. Care should be taken to avoid prolonged exposure to the concentrated atmosphere of the chlorinator shell.
