SUBJECT: BOX LABELING - DANGER vs. CAUTION

A review of our finished goods warehouse and storage area has indicated several boxes of finished goods are labeled incorrectly. Current regulations specify that a "Caution" label be on non-asbestos finished goods and a "Danger" label be on all finished goods containing asbestos materials. Please review with your employees the attached "correct" labels to be used on the specified materials. If you have questions and/or need additional information, please advise.
