July 26, 1938.

Ethyl Gasoline Corporation
Detroit, Michigan

Attention: Mr. S.D. Heron

Gentlemen:

As a precaution we have installed a blower on our spark plug reconditioning bench to pull the dust from the cleaning apparatus and discharge through the roof of the building.

I am inclosing a sample of this dust and wonder whether you would please analyze it and report whether or not there might be a health hazard connected with this job.

Thanking you for any comments you might care to make.

Very truly yours,

PRATT AND WHITNEY AIRCRAFT
