

Nov 2, 1945

Dr. J. G. McDonald
Professor and Chairman
Dept. of Epidemiology & Health
McGill University
1035 Pine Avenue West
Montreal, P. Q.

Dear Dr. McDonald:

I have just returned from my meeting at the Industrial Hygiene Foundation in Pittsburgh. Dr. defreville very kindly suggested that I should be very happy to have you visit the Foundation and discuss the problem of asbestos. I, of course, will be very pleased to have you visit our Research Center on your way to or from Pittsburgh. I would suggest that you consider what time would be most convenient for you to leave McGill and let us know. Dr. defreville and I can then make the respective arrangements.

It was indeed a pleasure to see you and to discuss the problem of asbestos recently. Once again, I want to apologize for the interruption of my correspondence but hope that future cooperation with you will compensate in some measure for this.

Sincerely,

Samuel H. Jones, Jr.
Industrial Hygienist
