#

1 - It was agreed that the SPI transcript of the OSHA conference be submitted to OSHA under its request for information due May 9. The transcript from the official OSHA recorder will also be considered for submission to OSHA so as to make it a part of the record.

2 - In reviewing the OSHA list of 11 requests for information (Federal Register December 18, 1979), the following were identified for review:

- (1) VC exposures at levels under 50 ppm -
(Dr. Torkelson will critique this area)
- (2) Transplacental Studies-
(Dr. Vance Kirkland of Shell will critique this area)
- (3) PVC Exposure - experimental -
(Dr. Dixler will critique this area)
- (4) Epidemiology - VC/PVC -
(Dr. Cooper will critique this area)
- (5) Case reports on other tumors -
(No ~~THE SOCIETY OF THE PLASTICS INDUSTRY, INC.~~)

355 Lexington Avenue • New York, N.Y. 10017

(212) 573-9400

SPI-11896

- (6) Mutagenic Study -
(No data known)
- (7) Body Burden Measurements -
(No new data known)
- (8) PVC Measurements, and
- (9) PVC Measurements
(Nick Wheeler will critique these areas)
- (10) Number of employees by occupation information
(No overall industry data available through
trade association. OSHA should have data as
reported by individual companies).
- (11) No information available
- (12) Other data for consideration -
(Consider commenting the CIVO study).

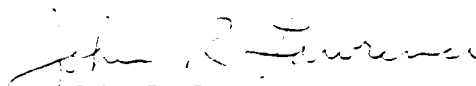

3 - The papers delivered at the OSHA conference of March 20-21, was reviewed for their match against the February request as follows:

- 4 - Consideration was given to the proposal by Boyd & Company to develop a VCM/PVC Toxicology literature file. It was agreed that Dr. Boyd would be invited to come to the April 18 meeting to further explain his proposal.
- 5 - Meeting dates selected for the continuation of this review are April 18 and May 1. Both of these meetings will be at the Keller & Heckman Offices in Washington, D.C.
- 6 - The meeting adjourned at 3:00 p.m.

Respectfully submitted,

John R. Lawrence
Technical Director
