

Just listen to how one user puts **SCHRAMM** to work...

"Our Schramm 105 is operating 16 hours a day", writes H. J. Lockwood, Plant Superintendent, Mullenbach Electrical Manufacturing Company, Los Angeles, "and during the day shift is on a 75% duty cycle."

"Considering that our usage of air at the time of the installation a year ago was 15% duty cycle, you can see how we have put air to work for us".

Schramm Stationary Air Compressors are chalking up similar performance records elsewhere. Users mention their "economy of operation", their "versatility", their ability to be used as a "unit system" installation.

You too will find Schramm Air Compressors offer many advantages and provide real savings. For further information on our complete line of air compressors write today.

Industrial Wipers

1109 • Designed to meet general industrial wiping needs, new wiping tissue consists of two Per-Embossed sheets working together for extra durability, cleaning action and maximum dirt removal. Chemical treatment provides important wet strength, manufacturer Scott Paper Co., Chester, Pa.

For many facts on these items, see pages 8, 143. Identify your request with these numbers.

Safety Goggles

1151 • New line of cup-type goggles, trade-named SAF-J, includes chippers and welders' types. Manufacturer claims goggles feature good ventilation and light weight without sacrificing strength and durability. Lenses are of scratch-resistant plastic or hardened glass. U. S. Safety Service Co., 1215 Market Street, Kansas City, Missouri

Storage Cabinets

1123 • Newly developed line of file cabinets permits user to store various sizes of parts in any amount or proportion. User may select best combination for his requirements from 24 different stock models; additional combinations can be custom-made to meet special conditions. Akro-Mils, Inc., Akron 9, Ohio

Plastic Tubing

1147 • Plastic tubing joined to Swagelok tube fittings by means of Swagelok insert is reportedly resistant to chemical action and oxidation, non-contaminable and extremely flexible. Tubing is available in sizes from 3/16 in. OD up and is applicable for piping of water, gasoline and certain oil solutions. Crawford Fitting Co., 884 E 140th St., Cleveland 10, Ohio

DREW TECHNICAL BULLETIN

DREW ORGANIC AL

Sludge Conditioner and Stabilizer

Used in conjunction with conventional inorganic water treatment to:

- a) Prevent sludge from adhering to boiler metal surfaces
- b) Prevent deposits in pre-boiler section

DREW SLUDGE CONDITIONERS SOLVE COSTLY BOILER PROBLEMS

Drew Boiler Water Treatment includes several highly effective Sludge Conditioners such as Drew Organic AL. Each has been developed to correct specific conditions in industrial water systems.

One major southeastern manufacturer was having difficulty with sludge and scaling in 13 boilers in 5 plants. Drew recommended a treatment of alkali, phosphate and Drew Sludge Conditioner AL. The entire system was cleaned up quickly and there has been no further trouble, costly maintenance or parts replacements.

To prevent or eliminate industrial water problems in your plant, you'll get results faster and more economically with this Drew program:

1. Thorough study and analysis of the problem
2. Use of effective organic and inorganic products
3. Efficient methods of feeding products to the system
4. Control of dosages by simplified plant testing
5. Service by qualified field engineers.
6. Technical assistance by the Drew Technical Department

Write for booklet "Complete Boiler Water Conditioning" and technical bulletins.
