Cincinnati, Ohio.

RE: [REDACTED] v. Petroleum Casualty Co.

Dear Sir:

As per my wire this morning, the above case was reset for May 31st and due to the importance of the outcome of the suit I deem it very expedient and advisable for you to be here and testify. It is absolutely impossible for me to state that the case will go to trial on May 31st but I am sure that it will be tried during that week, and unless otherwise advised I would like for you to plan to be here not later than Wednesday, June 1st to testify concerning your experiments with Ethyl gasoline and the effects therefrom.

I am herewith enclosing you a copy of Dr. Lummis' report who examined Mr. [REDACTED] prior to his death and who is a reputable and competent physician of Houston and President of the Medical Association of Houston.

On the other hand, I am also enclosing you a copy of a report of Dr. Denman of Lufkin which was filed with the Industrial Accident Board and I presume is in line with what his testimony will be upon the trial.

For your further information, I am sending you a copy of plaintiffs' allegations with reference to the injury so that you may know their contention so far as their suit is concerned.

After reading these documents I will be very much pleased if you will write me fully with reference to what your conclusions are and what you will be able to testify concerning the matter.

KE 0010932

#2 -

Thanking you in advance for this information
and hoping that you will arrange your affairs to be here
on June 1st, I am

Very truly yours,

K. W. Gilmore
K. W. GILMORE.

KWG:OD

Enc.

P.S. With reference to plaintiffs' allegations, copy of
which I have enclosed, of course we do not admit the truth
of any of these allegations and doubt very seriously if the
plaintiffs' decedent ever had anything more than the casual
cracking of the glass gasoline container, which was not
usual but not altogether uncommon.

KWG
