Dear Mrs. Ivarsson,
as an initiative to get downstream users more involved into the PFAS restriction process, the Fluoropolymergroup of pro-K, which is the association of the downstream users of the fluoropolymer industry located in Germany, did send out a 'sign-on-letter' to their member and associated companies to further contribute to the collection of information about the current usage of fluoropolymers in applications of the industry and private live.
These letters also should highlight the importance of fluoropolymers, its critical functionalities, related concerns and requesting the exemption of fluoropolymers from the PFAS restriction proposal.
As the chairman of the Fluoropolymergroup I am pleased to forward to you the signed letters, which were returned by the individual companies from various European countries; in total 38 companies from 8 different countries!

Please find attached the folder of 38 downstream user industry sign-on letters, together with an overview on the companies, participating in this initiative:

Please feel free to contact the Fluoropolymergroup within pro-K, either through its chairman, or through Mr. Ralf Olsen, pro-K, whenever it appears to you to be beneficial for the PFAS process.

With kind regards
Dr. Michael Schlipf
