

1 The latency tells us that any exposure a
2 few years before the diagnosis will probably have no
3 impact because the disease development will take
4 longer than that.

5 Q Okay. Dr. Wong, the jury has heard a lot of
6 testimony in this case about exposure levels to
7 asbestos.

8 Do exposure levels play into any of these
9 criteria that we have been talking about?

10 A Well, the exposure level would fit right
11 into here, dose, how much gets into the body.

12 Q Okay. I think you mentioned earlier this
13 morning that your specialty is occupational
14 epidemiology; is that correct?

15 A Yes.

16 Q Okay. So is it a part of your normal job to
17 look at exposures?

18 A Yes.

19 Q Okay. I would like to have you talk now
20 specifically with regard to asbestos exposures.

21 Have you had occasion as an epidemiologist
