Mr. August Hempel
CHICAGO

I talked to that doctor in Rockford, Illinois about your customer who had an employee get some Aroclor in his eye.

Not having the name of the employee made communication a little difficult but, anyway, I told the doctor he was to see this man at 1:00. The doctor then told me he would call me if there was anything unusual about the eye. I have not heard from him so I assume everything is under control.

R. Emmet Kelly, M. D.
