

Dr. I. E. Wallen

-2-

March 15, 1976

Since these limitations can lead to significant errors in determining trace levels of PCU's in environmental samples, we suggest that EPA carefully review the validity of the perchlorination technique. Results that have been obtained using this technique may not be valid.

If any other information is needed, please let us know.

Sincerely,

J. Coleman Weber
Manager, Product Acceptability
