Secretary, who shall immediately transmit it to each member of the Board of Trustees with letter ballot. If either a majority of the Board of Trustees votes to submit the said proposed amendment to the membership of the Society, or if the original petition is signed by at least seventy-five (75) voting members, the General Secretary shall publish it in a regular publication of THE SOCIETY prior to the meeting at which the proposed amendment is to be considered.

(2) Opportunity shall be given for discussion of the proposed amendment at the Annual Meeting next succeeding its publication and said proposed amendment may be modified by a majority vote, if a quorum be present as provided in the By-Laws.

(3) The members attendant at such Annual Meeting shall, by majority vote, determine whether the proposed amendment shall be submitted to THE SOCIETY for formal adoption. In the event of an affirmative vote thereon, the full text of the proposed amendment shall thereupon be published in an early issue of a regular publication of THE SOCIETY, and within thirty (30) days thereafter the General Secretary shall mail to all voters printed ballots incorporating or summarizing said amendment.

(4) The ballots shall be tabulated thirty (30) days after the date of mailing, and in the event that two-thirds of the votes cast shall favor said amendment, it shall at once become effective.

ON THE UP AND UP BUT OH, HOW SLOWLY!

Progress, if for you, must be by you. Each of us is, our own limitation except as we obtain cooperation of others, and even this is a self-limiting factor.

Here is a list of corporations who have paid a minimum of \$25.00 dues in support of this Society. In return they get publications that are worth more than \$25.00, and also the valuable cooperation of the leading ceramic corporations.

Will each personal member secure a new Corporation Member? Do this as your part in keeping up with the nonceramic competition which by research and education is crowding and satisfying markets that once were exclusively supplied by ceramic products.

ABBÉ ENGINEERING COMPANY, New York, N. Y.

 TAUBER, JOHN A., Ohio State University.

KNOW YOUR OWN

On the following pages are views in the executive office of your American Ceramic Society: where your three monthly publications are edited; where your library is being accumulated; where your photograph gallery is slowly growing; and where a representative exhibit of ceramic products is being collected.

You may justly be proud of what you have here and you will be more proud as your library, your photograph gallery, and your ceramic ware exhibits grow in extent and value.

Not shown in these pictures are the eight individuals through and by whom the affairs of the Society, secretarial and editorial, are coordinated and made to function.
