Mr. Earl J. Harris
Senior Analytical Chemist
State of New York Conservation Department
Rome Pollution Laboratory
8314 Fish Hatchery Road
Rome, New York 13440

Dear Mr. Harris:

We shall be most happy to send you a sample of aroclor 1248. The fluids are normally used as dielectrics and your application is completely different. We have no data or technical literature in this area.

We have heard reports from other countries, namely Sweden, of chlorinated biphenyl being found in the bones of animals, but we do not have any sound foundation to consider these.

Your use of aroclor as a piscicide is quite novel, and I am not sure it will work. However, we are dispatching a 4 oz. sample from our factory to you. You should receive this sample shortly. We would be very interested in your findings.

If we can be of further assistance, please advise.

Sincerely,

J. G. Bryant
Product Specialist
Dielectric Fluids
