Dear Dr. Harbison:

This letter is to confirm that I will meet you at National Airport, Washington DC for your arrival on American Airlines Flight 204 at 8:18p.m. on Monday, August 28, 1980. I will have a rental car available and we will drive to Linden Hotel, 5400 Pooks Hill Rd., Bethesda, MD, where two rooms have been reserved.

The following morning we will continue to Litton Bionetics, 5516 Nicholas, Kensington, Maryland, 20795. I informed Dr. David Martin that we should arrive at about 8:15a.m. and if necessary will spend the day there. He asked if we would need any special information; I said that the raw data and availability of the pathologist who wrote the pathology section of the PCB's report should be sufficient. If you think that you will require additional information, please call Dr. Martin at (301) 881-5600.

Should there be any change of plans, I can be reached on Monday, April 28 at the Chemical Manufacturer's Association-c/o Dr. Carol Stack (202) 328-4302.

Your trip to Litton will, of course, be at the expense of Monsanto Company.

Sincerely yours,

Peter E. Berteau (978)
