Hi Ryan,

Thank you so much for the invite. Unfortunately, this will not work with the Administrator's schedule.

Ashley Brown
U.S. Environmental Protection Agency
Director of Scheduling – Office of Administrator

Subject: Invitation for Administrator Zeldin

Caution: This email originated from outside EPA, please exercise additional caution when deciding whether to open attachments or click on provided links.

Eric and Aaron,

I wanted to extend an invitation from our President and CEO to the administrator to deliver remarks at one of ACC's largest conferences, Global Chem.

It is a conference of government affairs, regulatory affairs, practitioners, communicators and others all working in the chemical manufacturing sector.

The keynote timing in our agenda current is the morning of April 15. **However**, our conference runs April 14 to April 16 at noon. We can accommodate the administrator's scheduling accordingly and host him any of those days. The event is at the Grand Hyatt in downtown Washington DC at 10th and H Street, NW.

With the new administration, our participants would like to hear about his priorities and how the domestic chemical manufacturing sector can contribute. Taking from the 5 pillars speech, new policies to help permit new and innovative chemistries and basing regulations on the best science only ensures that the US domestic chemical manufacturing sector remains one of the safest, cleanest and innovative in the world continuing to produce the raw materials and resources necessary to support energy dominance, new auto manufacturing in the U.S., among many other domestic manufacturing goals. The chemical manufacturing sector is here to help you achieve the administrator's goals.

I appreciate the consideration. Please contact me with any questions at 202-679-1469.

RJ

Ryan Jackson
Vice President, Federal Affairs
