Dr. Robert Kehoe
Kettering Institute of Toxicology
Cincinnati, Ohio

Dear Doctor Kehoe:

I am trying to assemble some representative data regarding the
ratio lead concentration in brain in humans or in experimental
lead concentration in blood

animals who have elevated blood levels of this element. I am
particularly anxious to get ratios in young animals or humans
and in adults. We are searching the literature for this infor-
mation, but I thought that you might have run across data of
this type.

May I say, in closing, what a pleasure it has been to read your
most comprehensive chapter, in Tice's Medicine, on lead poisoning.

Many thanks,

T. George Bidder
