

INTRODUCING THE SILOO TRIGGER

The latest innovation in aerosols.

SILOO's most popular spray chemical products are now available with a new aerosol sprayer that gives positive directional control, even in tight spots. It's The SILOO Trigger—and since it sprays where it's supposed to, it's safer and more economical to use.

The SILOO Trigger's light, comfortable touch is easy on the hand, spray after spray after spray. Its shorter extension tube is every bit as accurate as a long tube, easier to maneuver, and easier to keep track of on the job because it slides right into the back of The SILOO Trigger.

The SILOO Trigger works hard for you, too—because its high performance doesn't come with a high price tag. In fact, for a limited time you can take advantage of special introductory pricing on SILOO Trigger PDQ, Brake Parts Cleaner, Engine Shampoo, and Carb and Choke Cleaner.

You'll get faster inventory turns, better profits. Don't miss out. Contact your NAPA Multi-Line District Manager today, and get SILOO Trigger Happy.
