re Brake documents you sent

Various National Standards and State (OSHA?) documents show a wide range of warning labels now among brake makers. 8/17/72, 3/9/73 some companies accepted OSHA label requirements in applying to trucks and more elaborate

Note the Proceedings of 1970 publication of proceedings of a conference on brake dust was conducted in 1969 material — what about 1971 minutes of discussion. Exact in 1969 when the draft was circulated & in 1970 when it was printed? Talk because have important knowledge about Brake Health Hazards to manufacturers.

The 1975 draft covering about exposure (>5 MPPCF) levels in some processes, indicated in documents, but not draft exists. To answer letter mentions were effective in lowering exposures. Is this the whole story?

AB-115 "Memo to Rufe" (12/12/75) shows very fine knowledge of medical issues and recommendations pertaining to average exposure of 0.5 f/cc, a limit OSHA proposed several months before. However this compares with Flex Comments to OSHA? OSHA docket could be checked. AB-141 Ltr. 12/15/75 suggests

1722 linden ave. baltimore, md. 21217 tel. 301-462-5135

AB-113
AB-121 Dr. CC Blackwell seemed to have had difficulty arranging presentation for the employee that would not scare them. Has he been asked about this?

AB-130 Dr. Colin Harwood apparently presented for colostomy take down after 1973 confrence (with Pederson attended). He "disappeared" from the colostomy soon afterwards. It would be very interesting to find them and ask about this experience with the colostomy. Is Kirk known Brit

AB-131 Quite document with about fifteen cases
AB-133 describing exposure. Again, the events
(AB-134) concerned mercury. Per letter from NIF
(AB-137) seem to me that exposure
(AB-152) were documented (virtually) by statement
(AB-158) containing actual measurements. (w-t AB-139)
(AB-170) Here, last exposures recorded.
(AB-171)
(AB-173)

AB-138 Drs. Blackwell and Lt. Kneckweg were involved with management here. Have either of them testified about that?

AB-144 Don Johnson, Tech (1/12/87 memo)

AB-146 Entire regulation issued #31 is Rad implies first knowledge by other Medical Officers in 1963 or later. Check perhaps with Dr. Hamlin's articles and other documents from there. (Minimum use of Hazardous of exposure.)

AB-149 A letter accompanying copies of Rivers' letter referred to in the "William Clement", about [illegible] Indian [illegible]

Store, of [illegible]
