DATE: 11 April 1984

FROM: H. A. Eschenbach

SUBJECT: British Tremolite Studies

I asked Corbett McDonald to check with Chris Wagner of Cardiff concerning their studies on tremolite which were mentioned in the Davis document from Edinburgh. Attached is Corbett's response and a copy of the Wagner document which we had obtained previously ourselves.

F. D. Pooley who has also visited the United States recently has indicated to Patrick Sebastien that Wagner is doing some research on zeolites which will require another inquiry on our part because of the Davison involvement.
