

LEAD INDUSTRIES ASSOCIATION

66 EAST 42ND STREET

NEW YORK 17, N. Y.

May 25, 1959

To Members of the Lead Pigments Technical Committee:

The following letter has been received from the International
Talc Co., Inc., P. O. Box 296, Gouverneur, N.Y., dated May 12, and
signed by Clifford L. Kitts:

"We are working on a brochure containing suggested formulations
of various paints using talc, our product, as the extender along with
the other pigments.

We have on hand your "White Lead Technical Bulletin #1", dated
November, 1951. Do you have any later formulations that would be more
in use today?

We are trying to assemble suggested formulas for house paints,
interiors and enamels based on oils, P.V.A. and acrylics.

Any formulas you may suggest will be appreciated."

Inasmuch as we do not have any additional information than
what appears in White Lead Technical Bulletin No. 1, I thought it advisable
to forward this request to members of the committee. If you are interested
in the above, will you kindly contact Mr. Kitts directly.

Sincerely yours,

David M. Boreina

David M. Boreina
Secretary, Lead Pigments Technical Committee
