

TITUS

Titus Mfg. Corp.

WATERLOO, IOWA

A complete line of grilles, registers and accessories for commercial and residential heating, ventilating and air conditioning.

Titus Mfg. Corp. are designers and manufacturers of Airfoil Grilles featuring the Airfoil Louver—patterned after the airfoil section of an airplane. The following distinctive features identify Titus Airfoil Louvers. (1) Smooth as glass streamlined surface (2) Solid construction (3) Noiseless performance (4) Minimum turbulence.

270 Airfoil Grille Gives 4-way directional control. Louvers set on $\frac{3}{4}$ in. centers. Individually adjustable to create any air pattern desired.

274 Multi-Shutter Register Airfoil Louvers are featured in front. Individually adjustable. Rear multi-shutter damper blades.

275—Double deflection register with opposed blade damper, key operated.

276 4-Way Multi-Shutter Register Consists of the #270 4-way directional grille combined with a multi-shutter damper. Damper blades inter-locked when closed to provide complete shutoff.

277 4-Way Registers with opposed blade dampers. Two front sets Airfoil louvers individually adjustable, $\frac{3}{4}$ in. spacing. Opposed blade damper key operated in rear.

230 Return Air Grille—blades on $\frac{3}{4}$ in. centers. Parallel to long dimension. Deep fins. Standard $1\frac{1}{4}$ in. beveled border. Any size grille can be furnished. R-240 (not illustrated) combines #230 return air grille with multishutter damper blades. R-241 (not illustrated) combines #230 with opposed blade damper.

AG-25 Volume Controllers provide positive control of air volume. Blades individually adjustable. Sponge rubber gasket holds unit firmly in duct.

AG-35—Opposed acting volume controller. Provides complete control of air volume to the outlet with minimum disturbances of air pattern. Louvers move simultaneously in opposite directions and can be set at any degree from full open to full closed.

AG-45—Air volume extractor and controller. Will control air volume and also produce balanced air distribution. Replaces extra volume controller. Fifty percent savings on cost and installation.

Perimeter Baseboard Diffusers—Made in 17 in., 30 in. or 60 in. lengths complete with built-in damper. Easily installed. Outstanding performance.

WRITE FOR NEW ILLUSTRATED CATALOG.

Door Grilles—No vision door and partition grilles. Made with flange frame or channel frame. All steel—V shaped louvers. T-700 standard thickness. T-800 thin core.

200 Series—New hi-efficiency sidewall or ceiling diffuser. Adjustable curved design louvers. 1, 2, 3, or 4 way deflection.

CONVECTOR GRILLES—Louvers closely spaced. Heavy-duty support bars on 6 in. centers. Over 70 percent free area. Can be installed in any special surface, such as marble or tile.

FRAME 115 FOR ALL AIRFOIL GRILLES AND REGISTERS (not illustrated) Allows quick easy removal for cleaning or adjusting. Can be installed either before or after plastering has been completed.
