Mr. Jack T. Garrett
800 North Lindbergh Blvd.
St. Louis 66, Missouri

Dear Jack:

In accordance with our conversation last week in Chicago, I should appreciate obtaining toxicological and safe handling data on five of your Hydraul products which we purchase from you. These are:

Hydraul AC
Hydraul F9
Hydraul 625
Hydraul 150
Hydraul A-200

Information in regard to the products composition will be treated as confidential. If you feel it necessary to withhold exact formulation, I should appreciate receiving a list of all ingredients, listing them as either over or under a certain percentage, or as an impurity.

For your convenience, I am enclosing two sets of our data sheets for each product. It would be appreciated if you would return one set to me and the other to A. C. Pabst at our New York office. We need the information on Hydraul AC as soon as possible, and for the other products, at your earliest convenience.

Thanks for your help in this matter. Hope to see you in Denver or Detroit next Spring.

Sincerely yours,

EKD/af
Encl.
