As a follow-up to a discussion item brought up in the Non-Asbestos Training session, attached is a Non-Asbestos vs Asbestos crossover list. This list will cover all general specifications, but does not cover possible exceptions that may occur. Exceptions should be treated on an as-required basis, and with the help of this writer or Plant Engineering.

Notice also included on this list is a price comparison for 3"-150# and 300# gaskets. This should guide you to use the most effective gasket for specific service.

P. L. Sharp
