Dear Doug:

Thanks for the follow up report with a copy of the 1974 report of the dust collection test monitored by Industrial Testing Laboratories May 1974.

As soon as the unit comes back from Gilroy, California we will want to get on a standard six month cycling schedule as you are now overdue to have your test run again. Maybe we will get on a regular six month basis, whereby, we will also have some test results developing on which we can base subsequent results.

Sincerely yours,

Julius Nemeth
