

PLAINTIFF'S
EXHIBIT
CAM-365

Date <u>9 NOVEMBER 1977</u>	
Client <u>COLGATE-PALMOLIVE COMPANY</u>	MA Project <u>6500</u>
Sample Description <u>Talc 1615, LAs #4811, 11/3</u>	
<u>X-RAY DIFFRACTION</u>	
Serpentine Content	_____
Amphibole Content	_____
Comments	_____ _____ _____ _____
<u>LIGHT MICROSCOPY</u>	
Serpentine Content	<u>none detected</u>
Amphibole Content	<u>tremolite detected</u>
Comments	<u>A small amount of tremolite is present, mainly as relatively coarse prismatic fragments - a few of these would be called fibers by OSHA. Other minerals present besides talc are apatite, a little quartz and celestite.</u>
