Subject: What's in store for automated vehicle testing?

Automated and Connected Vehicles Testing Symposium

June 20-21, 2018

Clemson University- ICAR Greenville, SC

The Future is Here, and it's Connected

Are you ready to explore what's around the corner? Join fellow engineers, scientists, and industry leaders from the top businesses and schools across the country to identify inhibitors and enablers bridging the gap between technologies, and products addressing the industry's top challenges of automated vehicle use. Going beyond traditional presentations, the **SAE Automated and Connected Vehicle Systems Testing Symposium** uses an applications-based discussion to uncover the reference-architectures, design- and implementation-choices, and detailed/statistical test results analyses needed to successfully assess and test automated vehicles for safe deployment.

The leading minds on this year's Executive Committee have come together to produce a powerful session lineup, with topics including:

- ☑ Safe Automated Vehicles Benchmarking
- ☑ To err is human. Is your automated vehicle safer than you?
- ☑ To Augment Reality (or Not): A Quintessential Test & Validation Question?
- ☑ SAE Automated Vehicle Standards and Initiatives

☑ Show Me the Money: Monetizing Vehicle Connections

Just one week left to save! Register by 5/30 to save \$100 off your registration.
