Max McCombs, Marty Strauss and I met today to discuss developing a "grassroots" campaign to maximize our chances of being awarded the subject DOE contract.

Mr. Strauss has agreed to take the lead in developing a timely program. He will work with the appropriate people at the plant, Peabody Coal and Energy Partners, Inc. In addition he will be working closely with the Washington Office and the Energy Staff of the National Association of Manufacturers.

TO: M. McCombs

As you are aware, our proposal to convert the #6 boiler to micronized coal technology was submitted to the DOE on Monday. In talking with Rick Sheahan of Energy Partners, Inc., he suggested that we should consider lobbying "appropriate people" to maximize our chances of being chosen to be funded. As he stated, everyone else will be pushing their programs. Whether "appropriate people" included local congressmen, DOE personnel or who, we were not sure. Could you help identify who we might want to talk to? If Mr. Sheahan finds out any contacts he will let us know.

My understanding is that the DOE will take around two months to review the proposals. Please let me know your thoughts and thanks for your continued support in this effort.

Russell Kuttenkuler
