Occupational Safety and Health Administration
203 Midtown Plaza
700 East Water Street
Syracuse, New York 14210

Subject: O.S.H.A. Citation - CSHO No. P-1568
Akron, New York Joint System Plant

Dear Mr. Whiteside:

This is a follow-up report on my September 4, 1973 report regarding the above subject. At this time we would enter the following progress report covering only the items considered incomplete when we last contacted your Department.

This is to advise that as of this date, 10-1-73 we will no longer use asbestos in our dry product line of Joint compounds. These bag products account for 40 to 45% of our production. This will remove the major source of asbestos contamination for our plant employees. Asbestos is still used in our wet product, Ready Mix. Our recent tests show that our controls meet the standard requirements in this area. The Permanent Engineering and administrative controls is still on schedule and no problems are anticipated in this regard.

If you or your staff require further information, please advise.

Very truly yours,

GEORGIA PACIFIC CORP.

J. D. Rauch
