CONSULTING: ULTRAMICROANALYSIS • MICROSCOPY • SMALL PARTICLE PROBLEMS • SOLID-STATE CHEMISTRY

16 March 1981

Mr. Lou Murino  
Cyprus Industrial Minerals  
555 South Flower Street  
Los Angeles, California 90071

Dear Mr. Murino:

I have completed my asbestos analysis of a sample of Cyprus Monoblend Talc Lot #110865, submitted with K. Lehman's letter of 13 January 1981.

The sample was analyzed with the transmission electron microscope (TEM) and electron diffraction. The sample contained chrysotile asbestos at a level less than 0.1% by weight. The chrysotile was identified by its electron diffraction pattern.

Thank you for consulting McCrone Associates. Please contact us if you have any questions.

Sincerely,

Richard M. Ellis, Jr.  
Research Microscopist
