DATE: Nov. 2, 1964

Huxtable informs us that Carrell Committee Hearing on the Danielson Bill is now definitely set for either November 16 or 17, definite day to be established later. Shults strongly advises, and rest of us concur, that we cannot let this Hearing go by default. Therefore Hesselberg will present statement as an up to date version of his previous testimony. Since we are suspicious that Patterson may also present statement dealing with his findings of lead in snow in Greenland, I have asked Bob Kehoe to attend the Hearings. He has a conflict but assures me he will do everything in his power to rearrange his schedule to be present.
