C. A. D'ALONZO, M. D.
MEDICAL DIRECTOR
RM. 11400 - NEMOURS

In reference to your memorandum of 11/8/66 regarding exposure to asbestos and to the insulating material, I enclose within the following information.

1. There are no full time insulators on our plant.
2. 50 employees (25 Pipefitters and 25 Pipefitter Assistants) do part time insulating, spending approximately 20% of their time in this type of work.
3. The most common insulation materials used:
 - a. Fiberglass
 - b. Magnesium blocks 85%
 - c. M 1 asbestos cement and MW 1 asbestos cement.
 - d. No spraying of insulation materials is done by employees, but one sub-contractor does use urethane foam.
4. We have had no known cases of Asbestosis, Mesothelioma, or carcinomas among our insulators.
5. We do not spray insulating materials as indicated above and the only safety equipment used in sawing and removing insulation are the normal equipment of gloves, hard hats, and safety glasses, etc. No respirators are used.

S. W. FADER, PLANT MANAGER
