Asbestos

We have made arrangements to sell our remaining inventory of
Amosite Asbestos to:

Brown Insulating Systems
11941 Abbey Road
North Royalton, Ohio 44133

Mr. James A. DeVenne, Executive Vice-President of Brown will be
sending you their Purchase Order No. 16879 to cover this material,
which they are purchasing at \$.32/lb. delivered their plant, and which
totals approximately 67,500 lbs.

We wish to have this material shipped to Brown as soon as possible,
and by copy of this memo I am asking Messrs. Brenner, Vrh and Brandt
to arrange for their outstanding inventories to be shipped to Brown,
prepaid, at the very first opportunity. Brown has requested that the
plastic overwraps in which the material was received from Earth
American Asbestos be kept on the material.

If at all possible, a Foseco truck should be used for this move-
ment; however, the material should move at the first opportunity.

The Accounts Department should note that since Brown does not
anticipate starting to use this material until September, they will
pay for 1/2 of the total quantity received on September 20, and will
pay for the balance on October 20.

Shipped 8-11-76 via J. Mitchell - Foseco Truck
Invoice J-83597, 33,990 lbs.
PSE/Kd/950 15 Pallets @ 20 Bags - 300
