In Re: O. D. #14593
[REDACTED]

Dear Doctor:

The above named claimant, [REDACTED] was employed by the Eagle-Picher Lead Company and became disabled February 13, 1937.

He is reported by his attending physician, Dr. Behrman, to be suffering from lead poisoning. We have on file, however, a report from the company physician, Dr. Matuska, in which he explains having examined the claimant at various intervals without any evidence of lead absorption and that on February 15, 18 and 22 he examined the claimant at home and treated him for an acute respiratory infection. His symptoms at that time were fever and pleurisy at the base of the left lung, requiring strapping for the relief of pain. The doctor does not consider his present condition to be due to lead poisoning.

We are referring the claimant to you for an examination and report and will be glad to have your opinion as to the cause of his present complaint and whether or not his disability is due to lead poisoning. The claimant's address is 1030 Mound Street, Cincinnati, Ohio, and we are instructing him to make an appointment with you.

Kindly file your report and fee bill using the above claim number.

Very truly yours,

W E O'Leary M.D.
Medical Investigator
