FILE NAME: Electrical Insulation (ELEC)

DATE: 1973 Aug 3

DOC#: ELEC014

DOCUMENT DESCRIPTION: Memo

INTER-OFFICE CORRESPONDENCE

BETHLEHEM STEEL

FROM E. B. Hay, Assistant Environmental Health Engineer DATE August 3, 1973

TO D. J. Risk, Dist. Purchasing Agent

SUBJECT Asbestos Product Usage

The Maryland State Division of Air Quality Control has requested Sparrows Point to supply them certain information on asbestos use at the Plant. Environmental Health Engineering has been asked to reply to the State. To do so, we need some information on the yearly consumption of the following: 12 mo

1. Asbestos rope used at the Blast Furnace Department - 2150 lbs
2. Asbestos mill board used by bricklayers in the Open Hearth — 9101 lbs
3. Asbestos seals used in the Box Anneal Furnaces at the Tin Mill and Cold Sheet Mill 0 lbs

Any information Purchasing could give us on the amount of these materials purchased during the past year would be helpful.
