The color ink for 1973 is to be BLUE.

You are probably aware that we are beginning to issue formulas with the lead level at, or below, .06%. When you receive these formulas, they will be so noted under "Remarks" on the back of the formula card, and the cans and cartons are to show an "L" in place of the "P" we normally show as part of the production number. Thus, an "L-9774-B" would indicate a "leadless" formula, production number 9774, and the formula suffix would be "B". Be sure you show the formula suffix at the end of the production, as a double-check to be used in the field to identify stock.

The "L" is not to be used for any other level of lead - just for .06% or below. Use "P" for all lead levels above the .06%.

If you have any questions on coding, please call or write me.
