

Internal
Memorandum

Date July 26, 1978

Letter No.

Southfield, Michigan

To Distribution

From S. K. Rhee

Subject P. Tsang's Report on International Conference on Health Hazards
of Asbestos

Attached please find a copy of the subject report. After reading the report, I feel that we have made a right decision to develop asbestos-free friction materials, and that we should phase out asbestos in our friction materials within a reasonably short period of time.
