DRAFT

6. Provide respirator storage cabinets.

7. Provide a means of evaluating the programs effectiveness--routinely.

8. Provide a means of insuring that an employee's physical condition allows he/she to use a respirator.

9. Establish a stock control program for purchase of respirators.

III - Develop and implement a program to insure compliance with OSHA 1910.1001 "Asbestos & other Chemicals" June 30, 1976.

1. Identify what constitutes an exposure to asbestos.

2. Provide a means to document handling asbestos.

3. Provide monitoring of asbestos exposures.

4. Establish a physical examination program.

IV - Improve housekeeping, fire protection and accident prevention over previous years by:

1. Recommending a self inspection program (July 15, 1976).

2. Recommending a hazard reporting procedure (March 1, 1976).

3. Coordinate one realistic emergency drill (date open).

V - Make safety related equipment more accessible and improve its availability. Complete by November 30, 1976.

1. Identify safety related items for continuous use.

2. Write specifications and identify vendors.

3. Submit stock control request to stock control committee.

VI - Operate within 2% of budget during 1976.
