

Drive on Rack

Model 2275

Here's the high volume Drive-On Alignment Rack that can be installed in a short bay because the hinged Approach Ramps can be raised upward so overhead doors can be closed. Runways are a full 13 ft. 11 in. (4242 mm) long to handle long wheelbase pickups and RVs as well as passenger cars of every size. One Runway is mounted on wheels to permit quick tread width adjustments from 34" to 76" (863 to 1930 mm). Runways are 16½" (419 mm) wide, permitting safe handling of wide-tired vehicles. Foot Rest Platforms—one on each Runway, permit easy under-hood access. Front wheel Safety Stops are removable. In addition to wide jack pads, Model 2275 has a slide-

away Jacking Beam which provides additional Jack positioning for front end lifts. The beam can be slid out of the way to provide wide-open working area under the vehicle. Model 2275 can be installed and ready for work in a few hours. Furnished complete with all installation hardware and a 36" x 18" (914 x 457 mm) 3-color promotional sign and No. 1300 Wheel Alignment Manual.
