DOCUMENT DESCRIPTION: Memo RE Status Report on OSHA Requirements for Subparts G&H at PACO, San Carlos

PACO TEXTURES MEMO

TO: Bob Miller FROM: Doug Merrill November 6, 1972

SUBJECT: STATUS REPORT ON O.S.H.A. REQUIREMENTS FOR SUBPARTS G & H AT PACO, SAN CARLOS

SUBPART G — Occupational Health and Environment Control - Having just completed the installation of a dust collection system, we will again monitor our plant for fiber exposure. We are researching better ways to handle the empty talc and asbestos bags. With the talc we plan to go to an enclosed bulk system and eliminate the used bag. We are having all of our labels changed to include the asbestos caution where needed. We have one area of noise exposure, that being the metal operation. Plans are now to relocate the equipment. We are temporarily using personal protective equipment.

SUBPART H — Hazardous Materials - No apparent violations.
