ASSISTANT DIRECTOR

ANTITOXIN AND VACCINE LABORATORY

December 18, 1924

Dr. Cecil K. Drinker,

Harvard School of Public Health,

55 Van Dyke Street,

Boston, Mass.

My dear Doctor Drinker:

Please take my thanks for Miss Ordway's kindness in sending me the information concerning lead poisoning. I am forwarding this to the manufacturer, but I rather imagine that he would like some information concerning the various risks in the lead industry and the means for preventing lead poisoning among industrial workers. If you know of any bulletins dealing with these subjects, I should appreciate it if you would let me know about them.

Sincerely yours,

HARVARD MEDICAL LIBRARY
