

September 25, 1969

Dr. Denzel E. Ferguson
Professor of Zoology
Department of Zoology
Mississippi State University
P. O. Drawer Z
State College, Mississippi 39762

Dear Dr. Ferguson:

As I told you by phone, Dr. Scott Tucker of Monsanto, Mr. Carman Mastri of Bio-Test Laboratories and myself would like to visit you on Thursday morning, October 2, at 9:30 a.m. to discuss fish testing techniques in connection with polychlorinated biphenyl compounds.

We will probably arrive the evening of October 1 and spend the night at the Starkville Holiday Inn. I don't know how long the discussions will take, but the other gentlemen have been told that you have a class to teach on the afternoon of the 2nd.

Sincerely,

Jack T. Garrett
Manager, Pollution Abatement
